TOWARDS WOMEN EMPOWERMENT

"My goal is to see every aspiring women to become an active contributor to the GDP of their country's economy. It's time to breakthrough the glass ceiling."

In the year 2014, I started formally working on Womennovator as a concept, but the story started much before. I have always felt that one of the core reasons that a Woman was unable to take up her passion, owes to the fact that there are not many who would listen to her and take her as a serious entrepreneur, as well as lack of business nuances. This led me to mobilization of small groups of women- no matter at what scale they are working or may just be with an idea; and connecting them to each other to get knowledge, inspiration & perspective. Today, when Womennovator is going Global; it's not only my vision, it's the vision of 10000+ women to reach out and their enthusiasm that has made what we are today. My team has been my pillar of strength who have been diligently working on this since it's inception.

**Looking forward to a brighter future, it's time to WIN!**
